HOW TO CALCULATE YOUR BILL.

Your meter has a number displayed similar to the one pictured above. Read the number from left to right. Numbers with a black background are not used in the calculation of your monthly water consumption and should be disregarded, Subtract the previous meter reading (provided in your statement) from your current observation. The results will indicate the amount of water used (in hundred cubic feet). To convert this usage to gallons multiply the amount by 748.1.

EXAMPLE
801 - 764 = 37 CCF x 748.1 = 27,679 GALLONS
