Hello Richard Robinson,

Your electricity and gas bill

For 23 December 2022 - 29 June 2023 (213 days)

The balance on your last bill (22 December 2022)	£61.44 in credit
You paid us (5 payments of £66.00)	£330.00 credit
Your charges for this period (including VAT)	£543.93
Your new account balance	**£152.49 in debit**

Your monthly energy payments are INCREASING

We've rolled your debit balance into your Direct Debit payments for the year.

To set your new monthly amount we look at your past usage and adjust it for typical weather patterns. With your balance and current prices (including VAT), we estimate that you will need to spend **£1,230.00** by the end of your next annual billing period.

We'll take one more payment of **£66.00**, which leaves 12 payments of **£97.00** in this billing period to keep your account generally on track. So, unless we hear from you, your Direct Debit will change to **£97.00** on **25 Jul 2023**

If you'd like to make any changes to your Direct Debit, a minimum of four working days' notice is needed before your next payment.

[1]Your gas meter measures usage in units, but like all suppliers, we have to do a bit of maths to turn it into kWh. Here's how it works:
GAS UNITS USED X CALORIFIC VALUE (39.0) X VOLUME CORRECTION (1.02264) ÷ 3.6

Subtotal	**£518.03**
VAT @ 5% of £518.03	£25.90
Total charges for this period	**£543.93**

Frequently asked questions

How do we work out your Direct Debit?

We work out your Direct Debit by including any past balance and also account for typical UK weather patterns. That way, any unusual weather last year doesn't mean you're paying too much or too little this year. The aim is to help you smooth your payments over the year as much as possible.

About your usage

We don't have enough information to show you a full comparison of this bill with the same period last year. These graphs will update on future bills as we gather more information about your consumption on each meter.
