ROBBINSDALE

Sample Utility Bill - Description of Charges

1 **Account Number:** Your City of Robbinsdale utilities account number.
2 **Billing Period:** The period for which the City is billing you for utility service (typically a 60 day period).
3 **Total Due:** The total amount due for your utility account.
4 **Due Date:** The date by which you must pay the total due. A 10% penalty is applied to the current bill amount if payment is not received by the due date.
5 **Read Date:** The date your present reading is imported for billing purposes.
6 **Usage:** The amount of water use at your property for the billing period. 1 unit of water = 1,000 gallons.
7 **BALANCE AS OF LAST BILL:** The previous total amount due for your utility account.
8 **BALANCE FORWARD:** The amount carried forward onto your current utility bill.
9 **WATER CONSUMPTION:** Water that you use for the two month (~60 day) billing period. This charge pays for pumping and treating the water. This charge is based on a tiered rate multiplied by your usage. For example, if you used 10.00 units of water (10,000 gallons) for the billing period, your water consumption charge would be $8.82 x 10.00 = $88.20.
10 **WATER CAPITAL SURCHARGE:** This charge pays for well repairs, water tower maintenance and repairs, etc. This charge is a flat rate of $1.63 per unit (one thousand gallons). For example, if you used 10.00 units of water (10,000 gallons) for the billing period, your water capital surcharge would be $1.63 x 10.00 = $16.30.
11 **WATER SERVICE:** This charge pays for maintenance and replacement of water mains. This charge is a flat rate of $16.05 per month and is reflected as $32.10 for two months on your utility bill.
12 **METRO SEWER CHARGE:** This charge pays for sanitary sewer treatment. This charge is a flat rate of $7.89 per unit (one thousand gallons). For example, if you used 10.00 units of water (10,000 gallons) for the billing period, your metro sewer charge would be $7.89 x 10.00 = $78.90.
13 **SEWER SERVICE:** This charge pays for maintenance and replacement of mains and lift stations. This charge is a flat rate of $13.67 per month and is reflected as $27.34 for two months on your utility bill.
14 **STORM DRAINAGE:** This charge pays for efforts to remove contaminants from (residential) storm water run off. This charge is $114.43 per acre per month for residential acreage. For example, for a 0.18 acre lot, your storm drainage charge would be 0.18 x 114.43 = $20.60 per month, reflected as $41.20 for two months on your bill.
15 **RECYCLING CREDIT:** Every residential customer receives a recycling credit of $4.00 per month which is reflected as $8.00 for two months on your utility bill.
16 **GARBAGE - NON TAX:** This charge pays for yard waste and recycling service.
17 **GARBAGE 32/64/96 GAL - TAXABLE:** This charge pays for waste that goes to the landfill.
18 **ORGANICS RECYCLING:** This charge pays for pick-up service for at-home composting (waste that consists mostly of food and other organic material). Every dwelling unit is charged a flat rate of $3.50 per month and is reflected as $7.00 for two months on your utility bill.
19 **SOLID WASTE MGMT TAX:** This charge pays for the tax on solid waste disposal.
20 **ACH CREDIT:** Residents who enroll in automatic payments will see this credit on their utility bill. This credit is $1.00 per month and is reflected as $2.00 for two months on your utility bill.
21 **TOTAL CURRENT CHARGES:** The sum of charges for your current billing period minus the recycling credit and ACH credit.
22 **TOTAL AMOUNT DUE:** The total outstanding balance on your utility bill. This is the sum of balance forward and total current charges.
